

The VeriTest[®] Proficiency Programme is designed for laboratories routinely testing Cannabis oil and flower. The programme presents two categories - flowers and oils, both offering a range of tests relative to the industry.

PROGRAMME OBJECTIVE

The VeriTest[®] Cannabis Proficiency Testing scheme has been developed to enable laboratories to validate their test methods and benchmark their results among a network of competent laboratories.

BENEFITS OF PARTICIPATING IN VERITEST[®] CANNABIS

➤ Confidence in Results:

Measurement of performance in comparison with other laboratories provides confidence that:

- Precision and accuracy of test results are within scheme limits
- Results from another laboratory (or group of laboratories) are likely to be within scheme limits

➤ Credibility:

Performance can be demonstrated to:

- Customers
- Regulatory Authorities
- Accreditation Agencies

➤ Compliance:

- Laboratory Standards (e.g. ISO 17025)
- Regulatory and market access requirements
- Export Certification

➤ Training:

- Test performance from individual analysts can be monitored and reported over time.

PROGRAMME FEATURES

- Comprehensive range of sample types and tests
- Participation provides opportunity to benchmark results against several reputable laboratories
- Technical direction from Technical Advisory Group ensuring relevance to current industry needs
- Proven statistical format and sample quality
- Individual Reports per round for each test

ACCREDITATION

- Global Proficiency is accredited to ISO/IEC 17043:2010 Conformity Assessment - General Requirements for Proficiency Testing; our scope does not currently include the VeriTest Cannabis programme.

- Global Proficiency is also accredited to ISO 17034: General requirements for the competence of Reference Material Producers. For information on the range of Reference Materials offered, please visit our website.

SAMPLE TYPES

Cannabis materials are sourced in New Zealand.

- Dried and ground cannabis flowers
- Cannabis Oil

These categories are currently offered once per year usually in April. Extra rounds can be added pending interest from participating laboratories.

AVAILABLE TESTS

- Terpene profile
- Metals
 - Arsenic
 - Cadmium
 - Lead
 - Mercury
- Major Cannabinoids
 - THCA
 - THC
 - CBDA
 - CBD
 - CBG
 - CBN
- Water Activity (flowers only)
- Moisture (flowers only)
